A mathematical addition problem using chickens as counters. It shows 6 chickens plus 5 chickens equals 11 chickens.

A visual representation of addition using chickens as counters. On the left, there is a group of five chickens with the number '5' written above them. In the center, there is a plus sign ('+') followed by another group of two chickens with the number '2' written above them. To the right of the equals sign, there is a final group of seven chickens.
